Spiritually Integrated Psychotherapy (SIP)

A nine month program from Solihnten for therapists interested in sharpening their skills in the spiritually informed treatment of the whole person— Mind, Body, and Spirit and Community

For therapists licensed for fewer than five years.

Deepen your skills with extended instruction and consultation. Sharpen your clinical and spiritual assessment skills. Re-establish and reinforce your familiarity with important clinical theories and their application in the spiritually sensitive therapy crucible.

For your clients

- This provides an opportunity to understand more deeply the search for meaning in their lives.
- Studies suggest that spiritually-oriented psychotherapeutic approaches may be beneficial to individuals with certain psychological problems (e.g., depression, anxiety, stress, eating disorders, suicidal ideation, and substance and alcohol use).¹

Outcomes of Religious and Spiritual Adaptations to Psychotherapy: A Meta-Analytic Review
Timothy B. Smith, Jeremy Bartz & P. Scott Richards Pages 643-655 | Received 20 Jul 2005, Published online: 17 Oct 2007

Curriculum Areas of Study

- Methods of clinical and spiritual assessment that can ground treatment planning
- Understanding of the therapist's spiritual and therapeutic development and how it affects the therapy process
- Working familiarity with important clinical theories and their application

- Addresses Systems, Cognitive-Behavioral, and Psychodynamic approaches
- Emphasis on how spirituality is present in the clinical work of these theoretical approaches with individuals, couples, and families
- Reading assignments will be provided, along with case studies.

Registration Deadline: August 12

Solihten Network Affiliates:
