

Spiritually Integrated Psychotherapy – One Class at a Time

Who, What, Where, When and Why of Spiritually Integrated Psychotherapy

For clinicians who are interested in adding to their knowledge for practicing spiritually integrated psychotherapy (SIP), Solihnten has created a **NEW** offering of individual didactic “a-la-carte” classes focused on key aspects of this work. Offered by the same seasoned faculty as Solihnten’s popular ATSIP and SIP programs, these classes will be in an interactive didactic format. There will be no preparatory readings or case consultation found in the extended SIP and Advanced Training in Spiritually Integrated Psychotherapy (ATSIP) courses. CEUs will be available. *

The a-la-carte offerings are ideal for:

- Therapists who want to gain knowledge without time and expense involved in the full SIP/ATSIP courses
- Supervisors and clinicians who want to augment their competencies in SIP.
- Supervisors and clinicians who want to learn about using SIP with specific populations.
- Clinical and Training Directors who want to lay the groundwork for religious/spiritual competencies for their teams.
- Therapists and supervisors outside the Solihnten network who want an introduction to practicing SIP.
- Non-clinicians who are interested in learning more about SIP.
